Skip Fades & Tropo Takes Over

THE WORLDWIDE TV-FM DX ASSOCIATION

Serving the UHF-VHF Enthusiast

THE VHF-UHF DIGEST IS THE OFFICIAL PUBLICATION OF THE WORLDWIDE TV-FM DX ASSOCIATION DEDICATED TO THE OBSERVATION AND STUDY OF THE PROPAGATION OF LONG DISTANCE TELEVISION AND FM BROADCASTING SIGNALS AT VHF AND UHF. WTFDA IS GOVERNED BY A BOARD OF DIRECTORS: DOUG SMITH, GREG CONIGLIO, BRUCE HALL, KEITH McGINNIS AND MIKE BUGAJ.

Editor and publisher: **Mike Bugaj**
Treasurer: **Keith McGinnis** wtfda.org Webmaster: **Tim McVey**
wtfda.info Site Administrator: **Chris Cervantez**
Editorial Staff: **Jeff Kruszka, Keith McGinnis, Fred Nordquist, Nick Langan, Doug Smith, Peter Baskind, Bill Hale and John Zondlo,**
Our website: **www.wtfda.org;** Our forums: **www.wtfda.info**

AUGUST 2010

PayPal

Finally! For those of you online with an email address, we now offer a quick, convenient and secure way to join or renew your membership in the WTFDA. Just logon to Paypal and send your dues to **sales@wtfda.org**.

Use the address above to either join the WTFDA or renew your membership in North America's only TV and DX organization.

Membership with Paper VUD: $25/year
Membership with eVUD (.pdf): $11/year

Over 110 WTFDA members renew their club membership with Paypal. Why not join them?

ANOTHER ES SEASON FADES

As the 2010 skip season gradually fades from view, there's one point that we all can agree on; it wasn't long enough. It never is.

Some of us might stumble into a skip opening in August but the odds are turning against us. There's not much we can do at this point but start thinking about next summer.

For some of us it was a great season. For most of us it was okay. And for some DXers it was just lousy. The excitement level doesn't seem as high as it was in other years. Sure there was some great DX. Paul Logan caught some great FM DX. And he wasn't alone because here is a note from Mike Fallon, another UK FM Dxer reporting another astonishing FM Es reception:

"It has been brought to my attention that in the above issue you have mentioned Paul Logan's FM excellent reception of Puerto Rico but, disappointingly, you failed to mention my FM Record World distance reception of La Voz de la Luz, a religious station on 88.7 from Salvaléon de Higüey, Dominican Republic on 31 May, 2010 at 1248 UTC. Distance from my QTH is 4302 miles/6925 Km.

I was alerted to a possible Caribbean FM opening by Paul Farley in Sussex, UK who called to let me know that he was receiving A6 audio on 87.75. I also received it here and it was later confirmed to be Latin American Spanish, possibly Dominican Republic. A few minutes later I heard more Spanish audio on 88.7 with a studio discussion peaking to the W/SW from my location. The recording was passed on to Henrik Klemetz who was fairly sure the station was La Voz de la Luz. I emailed the station with the recording and a reply was received confirming that the clip was indeed their output.

I hope that you will be able publish a correction in the near future."

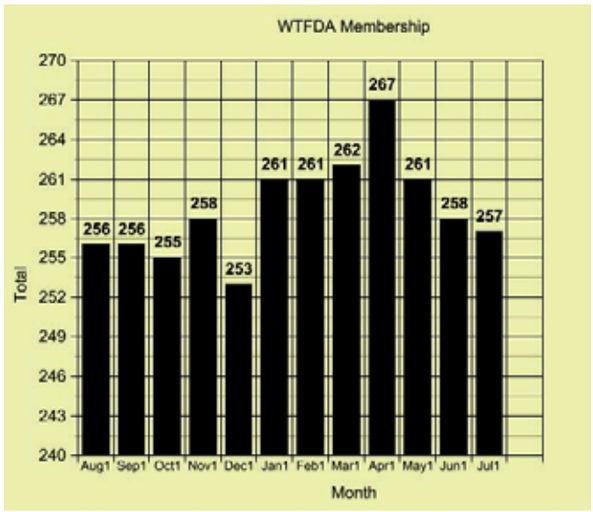

This is one reception that totally flew right by me. But it's something you should know about. It's not every day that an FM Dxer in the UK hears DR during an Es opening. Now if someone on this side could hear an FM station from the UK we'd *really* be thrilled!

MEMBERS AND THINGS

This month (the period between June 15th and July 9th) we had renewals received from Dave Bright (FL), J.P.Jones (SC), Stan Weisbeck (WA), Steve French (MN), John Ebeling (MN), Fred Laun (MD), William Lindsay (WA), Rod Jorgenson (WI), Dan Oglethorpe (LA), Al Tobia (CA), Eric Sundius (AZ), Randy Miltier (OR), John Johnson (MT), Bob Rush (MA), Lee Molineux (PA) and Jeff Falconer (ON). Thanks guys for helping make this club what it is (whatever that is). And as of this date (7/29) I have a long list of renewals and new members that will be printed next month. So keep them dues coming in!

From **Gary Siegel**(OH): "Sign me up for two more years in the club. The evolving analog-digital transitions are continuing to affect the hobby. So far more has been lost than gained, but some DX opportunities still exist. One of my best came on 7/4/10 at 1830 hours when I heard a ch4 during an E skip episode "Canada and Superstation NTV" ID for CJCN Grand Falls-Windsor, NF. Naturally I was thrilled. "Murphy" went away! This was TV #750 logged." Thanks Gary, and by the way, Gary has been in the WTFDA forever, which is even longer than I've been (almost forever).

Richard Gray (NOLA) writes:"Finally got the CM4251 and the VU-937SR/P8Z plug-in up and running – both with CM7777 amps. VHF analog is a Zenith Round tube color. Digital is done by DigitalStream OTA boxes. With oil on the beach, more DXing than ever is done."

Looking at this graph makes you wonder what happened in April. Nothing, I think.

THANKS!

Thanks for your patience this month as we will be a week behind in publishing this issue. All I can say is that if you get the chance to visit the Bahamas, go there. They may have to drag you kicking and screaming back to the plane at the end of your stay. And if you can stay at the Breezes in Nassau, you'll love it.

We will see you all next month!

Thanks to Bill Draeb for information appearing elsewhere in this column.

Note that the new LPTV stations at Cloverdale and Healdsburg, California are at the same site as the new Santa Rosa stations.

I expect we'll see quite a few more new LPTV grants in the next few weeks. There is a good chance we will run out of K13 callsigns...

Bill has seen "new" WMOW-12 Crandon, Wis. This is the same station formerly known as WBIJ, analog channel 4. The station's previous owners never built a DTV facility.

This spring, WBIJ was sold to the owners of WAOW-9/WYOW-34, and a DTV facility was built. The station is ostensibly a satellite of WAOW, but the mapping of the first two subchannels is swapped. WAOW is ABC on 9.1 and CW on 9.2; WMOW is CW on 12.1 and ABC on 12.2. Both stations are carrying This TV on their .3 subchannels.

(WMOW shouldn't be using major channel 12; by the PSIP standard incorporated in FCC regulations, it should be 4.1/4.2/4.3 instead of 12.1/12.2/12.3. Such violations are not particularly rare though.)

WMOW is somewhat bigger than a "four-letter LPTV" – running 3,200 watts on RF 12 – but it's not exactly a full-facility station.

Speaking of DTV stations mapping to the wrong major channels... WACX-55 in Florida has found itself in hot water with the FCC over improper mapping.

WACX has received a Commission Order to cease using 40 as their major virtual channel. Their RF channel is 40, but their old analog channel was 55. The PSIP standard, as incorporated by reference in the FCC regulations, requires them to use their old analog channel as their major virtual channel. However, they've been using 40.

WWSB Sarasota -- whose old analog channel was 40, and who is required by the same regulation to use 40 as their major virtual channel, complained that WACX's illegal use of virtual channel 40 was making it impossible for some viewers to receive WWSB.

WACX alleged that the FCC Video Division staff had ordered them to use virtual channel 40; that the A/65C standard covering major virtual channels (and incorporated by reference in FCC regulation 73.682(d)) did not exist on March 1, 2006 when WACX ceased analog operation and went digital-only; and that it would be burdensome for viewers and cable systems to change to virtual channel 55.

The Commission denies all three claims.

- The Digital Transition Authorization Letter, which WACX claimed authorized them to use major virtual channel 40, states "commence digital operations on DTV [c]hannel 40.". The FCC meant RF channel 40, and every other DTV station interpreted this letter that way.

- The FCC concedes that A/65C didn't yet exist on March 1, 2006. However, the previous A/65B version of the standard did exist - and A/65B contained identical language covering the selection of major channel numbers:

"For broadcasters with existing NTSC licenses, the major channel number for the existing NTSC channels, as well as the digital virtual channels, controlled by the broadcaster, shall be set to the current NTSC RF channel number."

- The FCC allows waiver of the PSIP standard when a unique situation exists that is not provided for in the standard. WACX has not (in the Commission's opinion -- or in mine) shown a unique situation not provided for in the standard.

Will WMOW receive a FCC nastygram? Good question. Actually, I wouldn't be surprised. Crandon is only 25km from the transmitter site of WJFW-TV Rhinelander – and WJFW remaps to channel 12...

Good DX!

2010 started with a trop opening to the northeast, in which I logged a new DTV station. I listened to a Contemporary Christian station on 104.7, expecting to hear the usual WCFL Morris, IL, but was pleasantly surprised to hear the ID from WFRN. The first E-skip opening of 2010 on May 20 allowed me to log three new Colorado stations. A short E-skip opening on May 24 allowed me to log KDCD 92.9; this is the first time I’ve heard this since 1986, when the station was KBIL. June 2 brought my shortest E-skip to date with the log of KDMX 102.9, which happens to be my first FM from the Dallas/Fort Worth Metroplex. Two new stations made it in from Arizona and one from New Mexico on the same opening. Two new CBC stations made it into my logbook on June 17; the next afternoon, south Texas and northern Mexico were all over my FM dial. It’s a good thing I took Spanish 101 back in 1986! The big surprise of the opening was KUHF 88.7, making it in through WSIE. The opening of June 24 favored Quebec and New England, although I logged three stations (including two new ones) in upstate New York. The openings on July 2 and 3 favored Manitoba and Saskatchewan, although CKDR made it through from Dryden, ON. I also logged this one when they were at 800 on the AM dial in January 2004. Another ex-AM station was logged on July 4, when I pulled in CKVM 93.1 through W226BC. I heard this one when they were on 710 in November 1994. The end of an era in St. Louis radio occurred at 2200 CDT on July 6, when KFUO-FM 99.1 Clayton, MO signed off for the last time, ringing down the curtain on St. Louis’ last Classical music station. That allowed me to clean up on 99.1, pulling in Danville for the first time since the mid-1980s (when it was WIAI), and adding WCBL, KYOO and KSKB, plus adding KUNQ on 99.3. The station returned to the air at 0700 CDT as Contemporary Christian KLJY, “Joy FM 99.1”. 73, Eric (NØUIH)

The Editor's Note

As active as June was for E-skip in many locales across the nation, July was the polar opposite, with no major openings anywhere past the 4th. It looks to be a disappointing end to what had been a wild Es season that started in April with a couple events in the east. We hold out hope for some August flare-ups, but if not, turn our attention to tropo. Some decent trop events have been happening in the Midwest and Plains, while the east and west coasts have been relatively quiet. Cooler air should finally put a dent into what has been a long, hot summer for many toward the end of August, and with the changes in weather should come good tropo, we can hope.

This Es season has really held to the "month cycle" phenomenon often observed with Es, with frequent openings around the beginnings of the months, and deep Es droughts otherwise.

The event of 5/31 was strange, though I think I have observed it before – where tropo does not merely die out, but turn tables and makes conditions much worse than usual. I had feared that my antenna or receiver had failed, because the Detroit stations, usually reliable, became too weak to decode and quite unstable. Two hours later, everything was back to normal.

The Colombia stations both had the distinctive Caracol bug in the lower right, and ads referencing Colombian businesses were seen in both. The Santa Marta and Magangue stations appear to be the only Caracol stations on channels 4 and 2 (respectively), and I've written Caracol to confirm that. There is more than one RCN on channel 2, so it will remain a unID.

7/3 will remain memorable for its trop (personal longest VHF DTV tropo and opening deep into Ontario) and skip (suddenly doubling my DTV Es total).

More frustrating was the portable DXing at work – one day I lacked the power to run the TV set, the other, the cable to connect the Zinwell box to the TV, missing out on strong DTV Es signals.

2010 got started with a tropo opening on January 17, in which I was surprised to log WDIV 45, which decoded with video for a short moment and automatic conversion to channel 4.1. This is one Detroit station I never logged on analog TV. I also pulled in WIPB 23; the first time I've pulled this one in on their new digital channel. Another E-skip opening on February 1 brought in a new Canadian analog in CBLT8 on channel 2. The first DTV station on channel 2 made it in when KREX briefly decoded (and converted to channel 5.1) on May 20. It would be only my third DTV log via E-skip. The tropo opening on June 12 allowed me to pull in WVUT in digital format on 22; I never had this one on their former digital channel (52). I also noted WDKA putting its digital signal on 49; I also logged them on 50 in 2008. WDKA is also relayed on a sub-channel of KBSI 22. The E-skip opening on June 17 added two new analog Canadians in CIII2 on 2 and CHRO 5. I watched "Canada's Worst Driver" on CHRO; the grand prize for the worst driver was a trip to remedial driving school in Toronto! The opening on June 29 finally allowed me to log PSIP info from KOTA 2; this one converted to channel 3.3! Yet another E-skip opening on July 1 allowed me to pull CKBI 5 through CKX. Morning tropo on July 3 resulted in my first low-power DTV log, WLCF-LD 45. They were carrying the Christian Television Network. As of July 14, the log stands at 543 analog TV stations and 112 DTVs.

Regional temps warmed as of May 29, but were not really hot yet. This report for June 2010 starts at Wasco, with some tropo enhancement to 100 mi and new loggins. In SBarb after that, conditions were calm but inversion-layer boundary was too high to see ducting, followed by unsettled weather fronts. Some heat and tropo came in mid June but was unsteady heat and still not maintain really hot temps, resulting in mediocre tropo along the Calif coast to San Diego / Tijuana up to 200 miles, until the last two days with layer again too high.

Jun 1 -3	*Out of town – WASCO*
Jun 4-12	None (Santa Barbara)
June 13	Poor
Jun 14-15	Fair
Jun 16-28	Variably poor
Jun 29-30	None

Simple ch. # is analog. D-ch. # is RF-DTV, with remapped/data/brand ch. # in "quotes." Xltr=translator. New loggins underlined. All California except the unID'd Es.

JUN 1-3 WASCO, seen were new regular and some tropo enhancement to 100 mi (not regulars with my modest outside antennas).

Boy, the sporadic-E (Es) season came to a screeching halt, didn't it? In the past, it has seemed that the season started tapering off my mid-July, but really didn't end until perhaps August. But, in 2010, it was practically all over once we got past the July 4th holiday.

Still, the season hasn't been that bad overall. In fact, a very active VHF operator here in Memphis commented to me that this year was the best VHF season he had ever seen. That statement may be a bit of a stretch, but Summer 2010 did have some high points.

I spent most of the season cruising for new 2 meter (144 MHz) grids; and, I bagged quite a few. There were a nice handful of quite intense 144 MHz Es openings. For me, that meant 3 new states. For others, it brought some stunning distances: Oklahoma working into Washington, Western Colorado bagging South Florida, and the like.

Sure, we may get a few crumbs of openings over the next few weeks. There really isn't a giant "off switch" for sporadic-E. But, we are still now heading into the quiet months of late Summer and Fall. Maybe, a nice tropo opening will break up the monotony, but until the short mid-Winter Es season, it's time to get back on HF, or find some other activity.

Loggings

Eric Bueneman, N0UIH, 631 Coachway Ln., Hazelwood, MO 63042 EM48

This year's E-skip station on 6 Meters began as I was helping the St. Louis and Suburban Radio Club operate Special Events station WØL, celebrating the 83rd anniversary of Charles A. Lindbergh's historic solo trans-Atlantic flight. Before the season began, I added HF to my Amateur Radio activities by purchasing an ICOM IC-745 at the Winterfest in Collinsville, IL in January 2010. I purchased the rig from a member of the BEARS (Boeing Employees' Amateur Radio Society). The Kenwood TS-60 rig that I have in my Amateur Radio station was used in the SLSRC's Field Day operation (WØSRC) for the third year in a row. Here's the stations I worked so far this season. (All times UTC, all on 6 Meters, all modes SSB except where noted.

I've probably made more QSOs on 6 meters in 2010 than in the previous ten years combined. Most of them, however, were made from W5ZR's station in central Arkansas during the ARRL June contest… SUPERB Es conditions kept things quite interesting.

I did manage a few dozen contacts from the car on my way to and from Joel's station. (the contest started about an hour before I got there, and I had to leave with nearly nine hours to go.)

Contacts made on the way *to* the contest included Arizona, Minnesota, the Dakotas, Colorado, Nebraska -- and Connecticut, Maryland, and Virginia. On the way home, I covered quite a bit more ground across Arkansas and the western half of Tennessee. Contacts were made with Texas, Maine, Florida, Wisconsin, and Mexico. Also managed a 2-meter contact with Birmingham while about 40 miles west of Nashville -- probably not really DX (I'd imagine W4ZRZ has one heck of an antenna system) but it's a pretty good haul for my wimpy mobile antenna.

Again, remember these contacts were all made from a Ford Focus flying down I-40 at 70mph...

The subsequent weekend was good for another batch of interesting 6-meter work. There were some exotic callsigns in this batch too. Domestic contacts included Florida, Maine, and Texas. A bit further afield were contacts with VA2WDQ (Quebec), VE5UF (Saskatchewan), and the rather bizarre Toronto-area callsign CF3NAVY.

The first QSO of the weekend went even further afield, to YN4SU in Nicaragua. But that wasn't the best DX of the period. On June 20th, I managed to land 9A5CW in Croatia. It was a tough QSO, but we managed to pull it off. This was my first ever trans-Atlantic QSO on 6 meters via sporadic-E. (I have a few dozen F2 trans-Atlantic QSOs under my belt).

My 6m station is nothing to write home about. I've got an Icom IC-706 MKIIIG, running about 100 watts through about 200' of coax to a 7-element triband (20/15/10m) Yagi at 65'. There's probably about five watts left by the time it reaches the antenna, and which way that five watts goes is anyone's guess.

A few days later, I went north to visit the relatives in Milwaukee. Took a day to cycle around Madison; on the way back to Milwaukee, turned on the 6m radio. And heard a station calling CT3FQ in the Madiera Islands, off the African coast. Neat!, 6 meters is wide open to the East Coast, and they're working across the Atlantic.

Imagine my astonishment when I realized I wasn't listening to an East Coast station calling CT3FQ -- I was actually listening to the Madiera station himself! S9 on the meter, in the mobile!

The pileup turned out to be unbreakable, but I did find Gary CU2JT a bit down the band - and worked him on the second call. Working the Azores on 6 meters, from the mobile in Jefferson County, Wisconsin - never figured I'd do that!

Just for good measure, managed to work two Texans the next morning.

Nothing that exotic since, but I did manage a bit more overseas DX on the Fourth of July weekend. WP2B in the U.S. Virgin Islands made it in on the evening of the 4th; NP3CW in Puerto Rico made it into the log six minutes later.

Grids works on 6m since the 1st of the year:

DM34 DM41 DM53 DM64 DM68 DM78 DM83 DN84 DN94 DO61
EL06 EL87 EL88 EL95 EL96 EM00 EM01 EM10 EM12 EM13
EM20 EM32 EM40 EM63 EM65 EM66 EN10 EN34 EN36 EN43
EN44 EN45 EN93 FK68 FM07 FM19 FN03 FN12 FN13 FN31

plus WP2B, YN4SU, and 9A5CW who didn't send their grids.

HF operators are getting on the 6m kick. I've worked 71 stations on 6 meters this year (from my own station); I've worked those same operators over 900 times on frequencies lower than 50MHz. Many of the biggest names in HF contesting can also be found on 6.

John R Tudenham, W0JRP, 2824 Missouri, Joplin, MO 64804 EM27

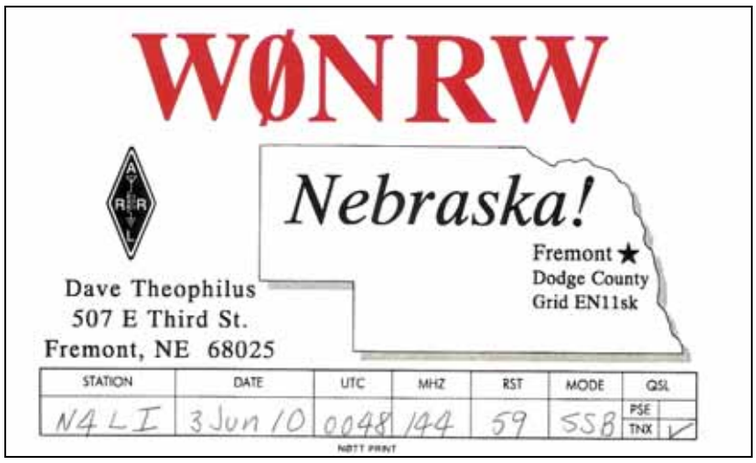

John sent me a listing of some of the 2m (144 MHz) stations here worked during the fabulous Es opening of June 18th. Yes, it was quite an opening:

6 meters is still wide open to the SE now some signals as strong as 40dB plus 9. 2 meters opened up for E skip at about 758pm local time to the northeast and east. I worked the following stations all SSB on 144.200 plus/minus about 20 kHz:

VE3KXP/EN92
W2EV/FN03
K2AXX/FN12
W1COT/FN31
WA2FGK/FN21
K1TEO/FN31
N3ZM/FN20

John also sent me an e-mail earlier in the season, mentioning his contacts with a nice handful of Latin American 6m stations, including YN2N in Nicaragua, XE1ARV in Mexico and a contact with Trinidad. (pb)

One of the cards from this Summer's 2 meter sporadic-E. W0NRW was only running 50 Watts into a Par-Omni antenna. It was quite an opening.

NRC/WTFDA CONVENTION 2009

August 27 through August 29.

There's still time for you to register for this event. See the July VUD or visit WTFDA.INFO for more information. Your room rate at the Brookwood Inn will not be guaranteed and may be higher after July 26th but there are other hotels in the area that you can check out for rates.
